

2026 Jetta

Quick-Start Guide

Driving Your Vehicle

Starting/Stopping the Ignition

The starter button is located on the center console, near the gear shifter.

Starting the Engine

1. With a valid vehicle key in the vehicle, press and hold the brake pedal.
2. Push the starter button.

Stopping the Engine

1. With the vehicle in Park, press the starter button.

Accessory Mode

"Accessory mode" enables limited vehicle functions without starting the engine, instead using the vehicle's 12 V battery to draw power.

To turn on "accessory mode":

1. With a valid vehicle key in the vehicle, push the starter button without pressing the brake pedal.

To turn off "accessory mode":

1. Push the starter button without pressing the brake pedal.

Remote Start

To start the engine with the remote start function, if equipped, you must press the following buttons on the key fob within 5 seconds:

1. Press the lock button  once.
2. Press the remote start button  twice.

See Owner's Manual for further details and important warnings about the keyless ignition feature. Do not leave vehicle unattended with the engine running, particularly in enclosed spaces, and consult local laws for any limitations on use.

Driving Your Vehicle

Gear Selection

The gear selector lever is located in the center console. When the ignition is switched on, the engaged gear is shown in the instrument cluster display.

To change gears:

1. Start the engine.
2. Press the brake pedal.
3. Move the lever toward you or away from you to select the desired gear.

The available gears include:

- P** - Park; the drive gears are locked. Only select when the vehicle is stationary.
- R** - Reverse; only select when the vehicle is stationary.
- N** - Neutral; no power is transferred to the wheels and no engine braking is possible.
- D** - Drive; forward driving gears.
- S** - Sport; the forward gears shift to fully utilize the engine power reserves.

To shift between **D** and **S**, tap the gear selector lever toward you.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Driving Your Vehicle

Start-Stop System

The start-stop system automatically switches the engine on and off when coming to a halt or when stationary, and when vehicle conditions allow. The engine restarts automatically when the brake is released or when the vehicle requires.

The start-stop function is automatically activated every time the ignition is switched on.

To temporarily deactivate the start-stop system:

1. Press the  button near the gear selector lever. The button will illuminate when the start-stop system is deactivated.
2. To reactivate start-stop, press the  button again. It will also automatically reactivate the next time the engine is manually stopped and restarted, or if the Eco driving mode is selected.

 [Watch the Start-Stop System video](#) .

 See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Driving Your Vehicle

Driving Modes

With driving modes, you can adapt various properties of the vehicle systems, such as suspension, steering, and climate controls, to the current driving situation, your desired driving comfort, and for a more economic driving style. The availability of driving modes depends on vehicle equipment.

Available driving modes may include:

-  **Eco** - Switches the vehicle to more fuel efficient operation compared to other driving modes.
-  **Comfort** - Provides a comfort-oriented vehicle setup
-  **Normal** - Offers a balanced calibration.
-  **Sport** - Gives the driver a sporty feel.
-  **Custom** - You can adapt the individual vehicle systems to your preferences.

Selecting the Driving Mode

For vehicles with a driving mode  button next to the gear shifter:

1. Press the driving mode button .
2. Continue pressing the driving mode button until your desired mode is selected.

OR

3. Tap the desired driving mode on the Infotainment screen.

For vehicles with an **ECO** button next to the gear shifter:

1. Press the **ECO** button to switch to the Eco driving mode and again to switch back to Normal.
2. If you switch the ignition off, the Normal driving mode is set the next time the ignition is turned on.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Steering Wheel Controls

Left-Side Controls

Buttons for operating the cruise control systems and for volume control.

 **Volume Buttons:** Adjust the volume for audio, navigation, and notifications.

 **Cruise On/Off Button:** Activates and deactivates the cruise control system.

 **Distance Control Button:** Sets the distance for ACC and Travel Assist to one of five levels from very short to very long.

 **Speed Adjustment Buttons:** Adjusts the set cruising speed.

 **Travel Assist Button:** Switches between ACC and Travel Assist.

 **Set and Resume Buttons:** Set and resume the cruising speed for cruise control systems.

Right-Side Controls

Buttons to control audio selections, voice control, and the Digital Cockpit.

 **Talk Button:** Activates the voice control system. A short press activates the native Volkswagen voice control system. A long press activates the voice assistant of a phone connected via App-Connect.

 **View Button:** Changes the Digital Cockpit view.

 **Media Buttons:** Control media with track forward and backward.

 **Up/Down Arrow Buttons:** Navigate menus within the Digital Cockpit.

 **Heated Steering Wheel Button:** Activates, adjusts, and deactivates the heated steering wheel function, if equipped.

 **OK Button:** Make selections and dismiss alerts in the instrument cluster.

 **Menu Buttons:** Navigate menus within the Digital Cockpit.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Seats & Mirrors

Seats

Adjusting the Front Seats

Power Adjustments

Seat comfort can be precisely tailored to meet the needs of the driver, with a power adjustable driver seat, if equipped.

The driver seat will have a set of controls located on the sideboard of the seat.

[Watch the Seat Adjustments video.](#) 

- 1 Adjusts the 4-way lumbar (if equipped).
- 2 Slides the seat forward or back.
- 3 Raises or lowers the seat cushion.
- 4 Adjusts the backrest angle.

Front passenger power seat feature available on select trim lines and may vary depending on vehicle equipment.

Manual Adjustments

For vehicles with manually adjustable seats, the controls present may include:

- 1 Move the lever upward or downward multiple times as needed to adjust the height of the seat.
- 2 To adjust the tilt of the backrest, turn the handwheel with nothing resting on the backrest.
- 3 (Not pictured) Pull the lever under the seat to slide the seat forward or backward.

Always ensure the seat is locked into place after making a manual adjustment.

Memory Function

The driver seat and outside mirror settings can be saved and recalled using the memory buttons, if equipped:

- 1. Adjust the driver's seat and outside mirror positions to your preferred positions.
- 2. Press and release the **SET** button.
- 3. Press and hold the desired Memory button (1, 2, or 3) until the chime sounds.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Seats & Mirrors

Mirrors

Adjusting Side Mirrors

1. Switch the ignition on.
2. Turn the knob on the driver door to the preferred symbol:

L - Adjusts the left outside mirror
R - Adjusts the right outside mirror
0 - Neutral position; outside mirrors can't be adjusted and all functions are switched OFF
3. To adjust the selected outside mirror, push the knob forward, back, right, or left.

Side Mirror Defrost

To turn on outside mirror heating, turn the knob to . This function works only when the outside air temperature is below approximately 68°F.

Folding in the Side Mirrors

The mirrors can be manually folded against the vehicle and back out as needed. Take care when folding the mirrors to avoid pinching your fingers between the mirror and the mirror base, and never fold the mirrors if there are any obstacles in the way.

Auto-Dimming Rearview Mirror

The auto-dimming interior rearview mirror, if equipped, contains two sensors to detect light. When the ignition is switched on, the sensors measure the amount of light entering from the front and rear of the vehicle. Depending on the measured values, the interior rearview mirror will dim automatically.

Automatic dimming will be deactivated in some situations, for example when the interior lighting is switched on or when reverse gear is engaged.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Doors & Windows

Locking & Unlocking Doors

Using Keyless Access

Keyless Access, if equipped, makes it possible to unlock and lock your vehicle without actively using the key. A valid vehicle key must be present within the vicinity of the vehicle to use this function.

Unlock with Keyless Access

1. Make sure you have your key fob with you.
2. To unlock the driver or front passenger door, push the button on the desired door handle once.
3. To unlock all doors, push the button on the door handle twice.
4. Pull the handle to open the door.

Lock with Keyless Access

1. Make sure you have your key fob with you.
2. Push the button on the door handle to lock all doors.

Using Central Locking Buttons

The central locking buttons located on the inside of the front doors function when the ignition is on or off, but only when all doors are closed.

Unlocks the vehicle.

Locks the vehicle.

Lock and Unlock Settings

Customize which doors to unlock with Keyless Access

Keyless Access can be set so that pushing the button on the door handle once does one of the following: unlocks only that specific door, unlocks all vehicle doors, or unlocks all doors on the side where the key is located.

1. Make sure the vehicle is parked. The vehicle will not allow you to customize Keyless Access while driving.
2. Select **CAR** from the Infotainment touchscreen.
3. Select **Settings**.
4. Select **Open and close settings**.
5. Select **Unlock doors** and select which doors to lock or unlock with Keyless Access:
 - "All doors" unlocks all doors.
 - "Single Door" unlocks only the door whose button was pressed.
 - "Vehicle side" unlocks only the door on the side where the key is at the moment.

Central locking acoustic confirmation

When enabled, the central locking acoustic confirmation tone will sound as an audible confirmation when locking your vehicle with the key fob. You can enable or disable this within the Infotainment system by following these steps:

1. Select **CAR** from the Infotainment touchscreen.
2. Select **Settings**.
3. Select **Open and close settings**.
4. Select or deselect **Central locking acoustic confirmation** as desired.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Doors & Windows

Window Operation

Opening and Closing the Windows

To open or close any window from the driver's door, press or pull the switch  that corresponds to the window you wish to operate.

To open or close the window on a specific door other than the driver's door, press or pull the single switch  located on the door.

On the driver's door, there is also a button  that deactivates the power window buttons on the rear doors.

One-Touch Opening and Closing

The one-touch opening and closing function allows the windows to be completely opened or closed with a brief touch.

- To start the one-touch opening function, press the window switch downward briefly.
- To start the one-touch closing function, pull the window switch upward briefly.
- To stop the one-touch opening or closing function, briefly pull or press the switch again.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Doors & Windows

Sunroof & Sunshade Controls

Sunroof Operation

The power tilting and sliding panoramic sunroof, if equipped, is controlled using the sunroof  button on the overhead console. The sunroof button has two "levels." To stop an operation at any time, press the same button used to begin the operation.

Opening and Closing the Sunshade

To open or close the manual sunshade, simply use the handle to push or pull it to the desired position.

Tilting the Sunroof

- **Manual Tilt:** Press and hold the front or rear of the sunroof  button to the first level until the sunroof reaches your preferred position.
- **Automatic Tilt:** Briefly press up on the front or rear of the sunroof  button to the second level to fully tilt or close the sunroof.

Opening and Closing the Sunroof

- **Manual Operation:** Push forward or backward to the first level on the sunroof  button and hold until the sunroof reaches your preferred position.
- **Automatic Operation:** Briefly push backward or forward on the sunroof  button to the second level to fully open or close the sunroof.

 See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Wipers & Lights

Windshield Wipers

The windshield wipers, controlled by the lever on the right side of the steering column, only work when the ignition is switched on and the hood is closed.

To use the wipers, move the wiper lever to the desired position:

OFF - Wipers are switched off.

INT - Rain sensor function OR interval wiping for vehicles with rain sensor function disabled.

LOW - Slow wiping speed.

HIGH - Fast wiping speed.

1x - One-tap wiping – push lever down for brief wiping.

Use the switch on top of the wiper stalk to adjust the sensitivity of the rain sensor, or for interval wiping speed when the rain sensor function is turned off.

To clean the front windshield with windshield washer fluid:

- Pull the lever toward you to use windshield washer fluid to clean the front windshield. Fluid will continue to flow and the wipers will continue operating until the lever is released.

[Watch the Front and Rear Wipers video.](#)

 See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Wipers & Lights

Exterior Lighting

Turning the Headlights On and Off

Turn the headlight switch, located to the left of the steering wheel, to the desired position:

- **0** - The lights are switched off.
- **AUTO** - The headlights will switch on or off depending on the brightness and weather conditions.
-  - The parking lights and daytime running lights are switched on.
-  - The low beam headlights are switched on.

Additional Lighting Features

Light Assist

Light Assist, if equipped, automatically controls the high beam headlights, activating them when darkness is detected and dimming them when oncoming vehicles, vehicles ahead, or well-lit areas such as towns are detected.

To activate Light Assist:

1. Turn the ignition on.
2. Turn the headlight switch to the **AUTO** position.
3. Push the high beam lever away from you, out of the basic position.
4. When Light Assist is activated, an indicator light  will appear in the instrument cluster:
 - *Blue light*: The high beam headlights are turned on.
 - *White light*: Light Assist has dimmed the high beam headlights.

To adjust the sensitivity of Light Assist:

- *Increase sensitivity*: Push the lever forward and hold it in place for about 15 seconds. The indicator light in the instrument cluster will blink three times in confirmation.
- *Reset sensitivity to standard setting*: Push the lever forward and hold it in place for about 15 seconds. The indicator light in the instrument cluster will rapidly blink three times in confirmation.

IMPORTANT: Within **CAR > Vehicle settings > Lights** is a section titled “Light Assist.” These settings refer to other assistive lighting features, not the Light Assist function.

Exit and Entry Lighting

When you are entering and exiting the vehicle in the dark, the Exit and Entry lighting function – also called the Coming/Leaving home function – illuminates the immediate area around the vehicle.

Entry lighting switches on when darkness is detected, the headlight switch is set to **AUTO**, and the vehicle is unlocked with the key fob. Entry lighting turns off when one of these conditions is met.

- The lighting duration set in the Infotainment system has elapsed.
- The vehicle is locked.
- The light is manually switched off.
- The ignition is turned on.

Exit lighting switches on when darkness is detected, the headlight switch is set to **AUTO**, and the ignition is turned off. When the last vehicle door or trunk lid has been closed, Exit lighting will remain on until the lighting duration set in the Infotainment system has elapsed.

To adjust the duration the lighting remains on within the Infotainment system:

1. Make sure the vehicle is parked.
2. Select **CAR** from the Infotainment touchscreen.
3. Select **Settings**.
4. Select **Lights**.
5. Scroll down to **"Coming/Leaving home"** function.
6. Adjust **"Coming home"** function and **"Leaving home"** function to your preferred duration.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Wipers & Lights

Ambient Lighting

Ambient lighting can provide indirect lighting in various areas of the vehicle interior.

The brightness and, depending on vehicle equipment, the color of the ambient lighting can be adjusted in the Infotainment system:

1. Make sure the vehicle is parked.
2. Select **CAR** from the Infotainment touchscreen.
3. Select **Settings**.
4. Select **Ambient lighting**.
5. Select the drop-down menu to select an option:
 - **OFF** - Ambient lighting is turned off.
 - **Manual** - The color of the ambient lighting can be selected.
 - **Automatic** - The color of the ambient lighting changes depending on the driving mode selected.
6. Select the icon in the lower right corner to adjust the brightness of the ambient lighting.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Climate Control

Setting the Temperature 1

Adjust the driver and front passenger temperatures to your preferred settings by tapping or sliding your finger left and right across the temperature sliders.

The temperature can also be adjusted within the Climate Control menu of the Infotainment system. Press **MENU** on the climate control panel to open the Climate Control menu.

AUTO 2

To automatically cool or warm the interior, use AUTO mode, which adjusts the fan speed and air distribution to efficiently reach your desired temperature. When AUTO is activated, it will operate like a thermostat to maintain the set temperature.

To use AUTO mode:

1. Set the driver's side temperature setting to the desired temperature.
2. Press the AUTO button if it is not already illuminated.

Note: If the fan speed or air distribution settings are manually updated, AUTO will be deactivated.

Max Defrost/Rear Defrost 3

Press **MAX**  to turn on and off Max Defrost, which dehumidifies the air and sets the fan to a high speed to help quickly clear fog and frost from the windshield.

Press  to turn on and off Rear Defrost, which uses heat conductors to help clear fog and frost from the rear window. Rear defrost automatically turns off after about 10 minutes.

To turn on outside mirror heating, turn the mirror adjustment knob to . This function works only when the outside air temperature is below approximately 68°F.

SYNC*

*Not pictured

With the SYNC function, the driver's settings are also applied to the passenger side.

To enable SYNC:

1. Select your preferred temperature with the driver's side temperature slider.
2. Adjust the fan speed and vents if desired.
3. Press the **MENU** button on the climate control panel to open the climate control menu on the Infotainment screen.
4. Press the **SYNC** button, which will highlight to show the SYNC feature is active.

Air Distribution 4

The Air Distribution button  directs air to the floor, panel, defrost vents, or a combination of vents. Tap the button repeatedly to cycle through the options, or select the desired air distribution option from the pop-up that appears on the Infotainment screen.

Fan Speed 5

Adjust the fan speed to the desired setting by tapping or sliding your finger left and right across the fan speed slider.

The fan speed can also be adjusted within the Climate Control menu of the Infotainment system. Press **MENU** on the climate control panel to open the Climate Control menu.

Seat Heating and Ventilation

Applies to vehicles equipped with heated and ventilated seats.

 - Press to switch on seat heating.

 - Press to switch on seat ventilation.

The default setting for both seat heating and ventilation is High. After pressing the button once to turn the desired function ON, press the button again for Medium, a third time for Low, and once more to turn it OFF.

 See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Navigation

Searching for a Destination

Press the **NAV** icon on the touchscreen to open the Navigation¹ **Home View**. The Home View shows your current position in the middle of the screen as a cursor that is situated in relation to the actual position of the vehicle. It also shows up to five suggested destinations which are based off of your last destinations, predicted destinations, favorites, or imported destinations from your myVW app². The Home View map is oriented with north at the top of the screen and the actual positions of the proposed destinations (0–5) are relative to the actual position of the vehicle.

To search for a specific destination:

1. Select the **Search** icon .
2. Begin entering a Point of Interest (POI) or address information with House number, Street and City.
3. When your search address or POI appears in the dropdown suggestion bar, select the correct address on the screen.
4. Select **Start** to begin the route.

Applies to vehicles equipped with factory-installed Navigation. When entering an address for another state, use only the two-character abbreviation for the state. Entering a destination on the touchscreen or changing any settings can only be done when the vehicle is stationary.

Additional Settings

With Route Options¹ you can:

- Choose between 3 alternative routes, if available, by clicking on the route info panel where the most recommended route is highlighted in blue.
- Use Dynamic route guidance³ if online traffic is available.

Before starting your route:

- Route options can be modified by tapping .

After starting your route:

- Modifications to the current route, such as avoiding tolls or seasonal restricted roads, are possible by tapping .
- Route criteria can also be modified by tapping  and selecting .

Searching for a POI

To find a specific point of interest¹:

1. Press the **NAV** function, then press  on the touchscreen to open the keyboard function to search POIs.
2. Search for your desired POI, i.e., airport.
3. Select **Start** to begin route guidance.

OR:

1. Press the **NAV** function, then select a POI currently displayed on the map (this is great for finding nearby fueling stations).
2. Select Start to begin route guidance.

Cancel Active Route Guidance

1. Press **Stop Route Guidance**  directly¹.

OR:

1. Select **Menu** icon  in the Navigation screen.
2. Select the **Stop Route Guidance** option on the touchscreen.

Alternative Navigation (App-Connect)

Turn-by-turn directions are also available by mirroring your favorite smartphone app to your Infotainment screen. Using the maps app on your device, you can connect to Volkswagen App-Connect⁴ wirelessly if available, or you can connect by using a manufacturer-approved USB-C cable.

¹ Applies to vehicles equipped with factory-installed navigation.

² myVW requires acceptance of myVW Terms of Service. Message and data rates may apply. Always pay careful attention to the road, and do not drive while distracted.

³ Premium Navigation requires myVW account, included or paid Premium Navigation subscription, vehicle to be equipped with compatible infotainment system with navigation, acceptance of myVW+ Terms of Service and availability of vehicle 4G LTE cellular and GPS connectivity.

⁴ Always pay careful attention to the road, and do not drive while distracted. Not all features available on all operating systems. Standard text and data usage rates apply. App-Connect features require compatible device, operating system, and mobile apps. See mobile device and app providers for terms and privacy.

Digital Cockpit

Image shown for illustration purposes only; actual feature may vary.

The Digital Cockpit allows you to customize the presentation of vehicle information in the instrument cluster display. The display can also be personalized using the Infotainment system. Select **CAR > Settings > Active Info Display**.

Resetting the Trip Odometer

On the steering wheel's right-side controls, press  or  until you see "driving data" in the instrument cluster. Use the up/down arrows  to select **Trip**, press **OK**, then press and hold **OK** to reset.

Opening a Menu or Information Display

1. Switch the ignition on.
2. If a message or vehicle icon is displayed, press the **OK** button to dismiss it, repeatedly if necessary.
3. To display a menu and to scroll through the menu, press the  or  button.
4. To open the displayed menu or the information display, press the **OK** button or wait until the menu or information display opens automatically after a few seconds.

Applying Settings in the Menus

1. Press the up or down arrow button  until the desired menu selection is marked with a frame around it.
2. Press the **OK** button to apply the desired changes. A check mark indicates that the respective function is switched on.
3. To return to the menu selection, press the  or  button.

Digital Cockpit Displays

You can use the **VIEW** button to switch between the classic display of dials, the large platform without information profiles, and the enhanced view with highlighted information profiles.

1. Press and hold the **VIEW** button to select from the preset information profiles in the list:

Classic - View without information profiles.

Automatic - The information profiles adjust to the selected driving mode for vehicles with driving mode selection.

Preset 1 - Custom selection of information profiles.

Preset 2 - Custom selection of information profiles.

Preset 3 - Only on vehicles with factory-installed navigation.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Personalizing the Infotainment System

Configuring the App Overview

1. Press the **MENU** button on the Infotainment system.
2. Tap and hold the desired app tile until it is highlighted; do not release it.
3. Move the app tile to your preferred position and release it.
4. Repeat for other app tiles as desired.

Configuring the Control Center

1. Swipe down from the top of the Infotainment screen to open the control center.
2. Tap and hold any function key until an additional window appears.
3. Tap and hold the function key you want to add until it is highlighted; do not release it.
4. Move the function key to your preferred position and release it.
5. Repeat for other function keys as desired.

Changing the Screen Brightness

1. Swipe down from the top of the touchscreen to open the control center.
2. Adjust the brightness slider to your desired setting.

Saving Radio Station Favorites

1. Press the **RADIO** button on the Infotainment system.
2. Tap **Source**.
3. Select your desired reception mode, such as FM.
4. Tap  and tune to your desired station.
OR: Select a station from the station list.
5. To save a station currently being played, tap  and select an empty favorites slot.
OR: In the station list, press and hold the desired station and select an empty favorites slot.

Sound Settings

Adjusting the Volume

System Volume

Adjust the system volume by turning the rotary knob on the left side of the Infotainment screen:

- Turn left to decrease the volume.
- Turn right to increase the volume.

You can also adjust the volume using the controls on the left side of the multifunction steering wheel:

 - Increase the volume.

 - Decrease the volume.

Navigation Announcement Volume

Applies to vehicles equipped with factory-installed navigation.

To adjust the volume of navigation announcements during active route guidance:

- Adjust the volume using the rotary knob or steering wheel volume controls during a navigation announcement; all navigation announcements will now be given at that volume.

OR:

- Tap the hamburger  menu icon.
- Adjust the slider to the desired volume or press  to mute navigation announcements.

To adjust the volume of navigation announcements outside of active route guidance:

1. Press the **MENU** button on the Infotainment system.
2. Tap **Sound**.
3. Select **Volume** from the bottom row.
4. Tap **Voice guidance**.
5. Tap **Volume**.
6. Adjust the slider to the desired volume.

Within the **Voice guidance** menu, you can find other navigation announcement settings, such as whether navigation announcements will be played during phone calls, if other audio will be lowered during navigation announcements, and more.

Adjusting the Volume of External Audio Sources

When you connect an external audio source, such as a phone, first lower the volume of the Infotainment system and then adjust the volume using the external audio source.

If the connected audio source plays too quietly, increase the volume of the external audio source. If the audio is still too low:

1. Press the **MENU** button on the Infotainment system.
2. Tap **Sound**.
3. Set the Input volume to **Medium** or **Maximum**.

If the connected audio source plays too loudly or the sound is distorted, lower the volume of the external audio source. If the audio is still loud or is distorted:

1. Press the **MENU** button on the Infotainment system.
2. Tap **Sound**.
3. Set the **Input volume** to **Medium** or **Quiet**.

Maximum Start-Up Volume

The Infotainment system always starts at the last volume set, as long as it doesn't exceed the set maximum start-up volume. To set the maximum start-up volume:

1. Press the **MENU** button on the Infotainment system.
2. Tap **Sound**.
3. Select **Volume** from the bottom row.
4. Tap **Maximum start-up volume**.
5. Adjust the slider to the desired setting.

Equalizer Settings

The Infotainment system may offer an equalizer that can be used to adjust the sound quality of audio by increasing or decreasing the volume of different frequency bands.

1. Press the **MENU** button on the Infotainment system.
2. Tap **Sound**.
3. Tap **Equalizer**.
4. Select the desired setting, then adjust the slider:
 - **Treble**: Adjusts higher-pitched frequencies.
 - **Mid**: Adjusts mid-range sounds.
 - **Bass**: Adjusts lower-pitched sounds.
 - **Subw.**: Adjusts the lowest bass frequencies output by the subwoofer, if equipped.

SiriusXM with 360L

SiriusXM with 360L¹ offers both satellite and streaming options for a multitude of music, news, sports, talk, and entertainment channels with live and on-demand content. It also provides a

personalized listening experience with recommendations based on your listening habits.

SiriusXM satellite radio requires a subscription.

To access subscription information:

1. Press the **RADIO** button on the Infotainment system.
2. Tap **Source**.
3. Select **SiriusXM**.
4. Tap  and tune to channel number "0".

The SiriusXM ID and the website and phone number for the SiriusXM activation hotline will be displayed on the screen.

To access SiriusXM content with an active subscription:

1. Press the **RADIO** button on the Infotainment system.
2. Tap **Source**.
3. Select **SiriusXM**.
4. Select your desired channel from the channel list, browse through categories and genres to find a channel, or tap  to directly enter a channel number.

SiriusXM live channels and on-demand content can be saved as presets; up to 36 presets can be saved.

To save a channel or content currently being played as a favorite:

1. Press and hold a favorites preset slot.
OR:
In the channel list or the list of on-demand content, press and hold the desired content and select an empty preset slot.

Setting the Clock

The clock can be set using the Infotainment screen. To set the time:

1. Turn the ignition on, with the vehicle in park.
2. Press the **CAR** button.
3. Select **Setup**.
4. Scroll to the **Time and date** menu item and select it.
5. Check box for Daylight-saving time if applicable.
6. Select your time zone to display the correct time.

¹Trial period begins upon vehicle in-service date. Trial length and service availability may vary by model, model year or trim. Service will automatically stop at the end of your trial subscription period unless you decide to continue service. Trial is non-transferable. If you do not wish to enjoy your trial, you can cancel by calling the number below. All SiriusXM services require a subscription, each sold separately by SiriusXM after the trial period. Service subject to the SiriusXM Customer Agreement and Privacy Policy, visit siriusxm.com to see complete terms and how to cancel which includes online methods or calling 1-866-635-2349. Some services and features are subject to device capabilities and location availability. Satellite service not available in AK & HI. Certain features and/or content may not be available in vehicles with SiriusXM with 360L unless an active data connection is enabled in the vehicle. Content varies by SiriusXM subscription package. All fees, content and features are subject to change. SiriusXM and all related logos are trademarks SiriusXM Radio Inc. and its respective subsidiaries.

SiriusXM with 360L requires vehicle to be equipped with compatible infotainment system, acceptance of VW Car-Net Terms of Service, and acceptance of Sirius XM Customer Agreement and Privacy Policy.

Connecting Your Phone

Bluetooth

Pairing a Compatible Phone

1. With the ignition on and the vehicle in Park, turn the Infotainment system on. Your vehicle's Bluetooth system will be in "discovery" mode.
2. From the Bluetooth menu on your compatible device, search for new devices and select MY VW XXXX (last four digits of VIN).
3. A connection request will appear on the Infotainment display.
4. Press **Connect** on the Infotainment display.
5. The touchscreen will then show a PIN.
6. Make sure the same PIN is displayed on your phone and press **Yes** on the Infotainment display, then press **Pair** on your phone.
7. Allow contacts to sync when prompted.

Note: If your phone displays a prompt asking to connect to your vehicle, make sure to enable future automatic connections. This will help to automatically reconnect the compatible paired device to the system. Once the PIN is shown, pairing must be completed within 30 seconds; otherwise, the process will need to be repeated.

Primary and Secondary Phone Functionality

Two active phones can be connected simultaneously. Follow steps 1-7 above. Only contacts from the primary phone will be shown within the Infotainment system. Switching between phones requires pressing the **Swapping** .

Note: This feature is not available when the phone is connected to Apple CarPlay® or Android Auto™.

Answer an Incoming Call

The Bluetooth system will interrupt your car stereo with a ringtone. Press the **OK** button on the multi-function steering wheel or the green Phone icon on the Infotainment touchscreen to answer the call.

Volume Settings on a Call

To adjust the volume of the Bluetooth system while on a call, press the **Volume Up**  or **Volume Down**  button on the left side of the multi-function steering wheel or use the volume control knob on the Infotainment system.

End a Call

If you are in the Phone Menu function, press the red **Phone** icon on the touchscreen.

OR:

1. Use the **Horizontal Menu** buttons on the right side of the multi-function steering wheel to access the Phone menu in the instrument cluster display.
2. Use the **Vertical Arrow** buttons on the right side of the multi-function steering wheel to scroll to **End**, if not already selected.
3. Press the **OK** button to end the call.

Switch to Private Mode

To prevent passengers from overhearing a conversation, switch a Bluetooth call to your mobile phone:

1. Once a call has been answered, use the **Horizontal Menu** buttons on the right side of the multi-function steering wheel to access the Phone menu in the instrument cluster display.
2. Use the **Vertical Arrow** buttons  on the right side of the multi-function steering wheel to scroll to the Telephone menu.
3. Use the **Horizontal Menu** buttons  to open the Telephone menu.
4. Use the **Vertical Arrow** buttons  to scroll to Private and select with the OK button on the steering wheel.

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Connecting Your Phone

App-Connect

Volkswagen App-Connect takes your experience to the next level by bringing your favorite smartphone features directly to your vehicle's touchscreen display. Simply pair your smartphone to your VW's Bluetooth® to start using compatible apps. Need to charge your phone while staying connected? Plug it into a USB port or place it on the wireless charger, if equipped, to enjoy both convenience and power on the go.

Always pay careful attention to the road, and do not drive while distracted. Not all features available on all operating systems. Standard text and data usage rates apply. App-Connect features require compatible device, operating system, and mobile apps. See mobile device and app providers for terms and privacy.

Apple CarPlay®

Apple CarPlay is a smart way to use your iPhone while you drive your Volkswagen. With an updated user interface that helps you control tunes, turns, and Siri® suggestions, a calendar app that lets you view and manage your day, and maps that reveal more of what's around you, getting there just got a whole lot easier—and a lot more fun.

Note: You will have to have had an unlocked iPhone within the past hour in order to use Apple CarPlay. When you are connected using Apple CarPlay, your iPhone can no longer be used as a MEDIA source or as a Bluetooth device.

Apple CarPlay is compatible with iPhone 5 or higher running iOS 7.1 or later. Further information can be found at support.apple.com and siriuserguide.com. Always pay careful attention to the road, and do not drive while distracted. Standard text and data usage rates apply. Apple CarPlay is a trademark of Apple Inc.

Wireless App-Connect – Apple CarPlay

To connect:

1. Ensure you are running the latest version of iOS on your iPhone®.
2. Pair your phone to the Volkswagen's Infotainment system with Bluetooth.
3. A prompt will display on the vehicle touchscreen asking if you want to use Bluetooth or Apple CarPlay.
4. Select **Apple CarPlay**. If this is the first time, accept the confirmation on your iPhone.

OR

1. Simply unlock your iPhone and plug it into the USB port using a certified lightning cable. After choosing to use Apple CarPlay, your iPhone will ask if you'd like to use Apple CarPlay wirelessly for future connections.

If you experience any issues with your wireless connection, try switching to a wired connection.

Note: Please confirm all prompts from App-Connect on the mobile device for successful Apple CarPlay connection.

- Disconnect from Apple CarPlay by pressing the **Menu** icon followed by the **Volkswagen Logo** icon, then selecting the **Disconnect** or **X** icon on the touchscreen.

 [Watch the Apple CarPlay Wireless Connection video.](#) 

Wired App-Connect – Apple CarPlay

To connect:

1. Ensure you are running the latest version of iOS on your iPhone®.
2. Unlock your iPhone and plug it into the USB port using a certified cable.
3. A screen will appear on the Infotainment system stating that a new device has been detected and will ask “Do you want to connect with Apple CarPlay?”
4. Select **Connect**.

- Disconnect from Apple CarPlay by pressing the **Menu** icon followed by the **Volkswagen Logo** icon, then selecting the **Disconnect** or **X** icon on the touchscreen. This will allow Bluetooth while charging your phone.

 [Watch the Apple CarPlay Connection video.](#) 

Android Auto™

Use some of your favorite Android applications on the road through your Volkswagen's infotainment screen. You can talk to Google on Android Auto to get driving directions, send a text, or place a phone call, hands-free. Android Auto is made to help you focus on the road while having fun along the way.

Always pay careful attention to the road, and do not drive while distracted. Standard text and data usage rates apply. To use Android Auto on your car display, you'll need an Android phone running Android 9.0 or higher, an active data plan, and the Android Auto app. Google, Android, Google Play and Android Auto are trademarks of Google LLC. Learn more at android.com/auto.

Wireless App-Connect – Android Auto

To connect:

1. Ensure you are running the latest Android™ OS on your device.
2. Pair your phone to the Volkswagen's Infotainment system with Bluetooth.
3. A prompt will display on the vehicle touchscreen asking if you want to use Bluetooth or Android Auto.
4. Select **Android Auto**. If this is the first time, accept the confirmation on your device.

If you experience any issues with your wireless connection, try switching to a wired connection.

Note: Please confirm all prompts from App-Connect on the mobile device for successful Android Auto connection.

- Disconnect from Android Auto by pressing the **Menu** icon followed by the **Volkswagen Logo** icon, then selecting the **Disconnect** or **X** icon on the touchscreen.

 [Watch the Android Auto Wireless Connection video.](#) 

Wired App-Connect – Android Auto

To connect:

1. Ensure you are running the latest version of Android™ OS on your device.
2. Unlock your device and plug it into the USB port using a certified cable.
3. A screen will appear on the Infotainment system stating t hat a new device has been detected and will ask "Do you want to connect with Apple CarPlay?"
4. Select **Connect**.

- Disconnect from Android Auto by pressing the **Menu** icon followed by the **Volkswagen Logo** icon, then selecting the **Disconnect** or **X** icon on the touchscreen. This will allow Bluetooth while charging your phone.

 [Watch the Android Auto Connection video.](#) 

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Connecting Your Phone

Charging Your Phone

Wireless

With the wireless inductive charger, if equipped, you can charge your Qi-capable mobile phone without the need to plug in a cable. Simply place it securely in the center of the wireless charger in the center console with the display facing up. An alert in the Infotainment system indicates when charging begins.

Be sure not to place any objects besides your phone on the wireless charger.

Wired

Your vehicle features several USB Type-C charging ports. USB-C ports allow you to connect your mobile phone to your vehicle using the latest generation of USB. To utilize USB-C, you must have a compatible cable. Many devices today feature USB-C charging ports. However, if your phone's charging port is different, you can find a cable that adapts your phone's charging port to a USB-C connector by [clicking here](#) .

See Owner's Manual for further details and important warnings. Always pay careful attention to the road and do not drive while distracted.

Voice Control

Voice Control Overview

Voice control¹ allows drivers and front passengers to perform various functions using spoken commands.

Some functions that the in-vehicle voice control system can perform are:

- Enter a navigation address*.
- Search for points of interest in listed categories*.
- Place phone calls from a paired device.
- Read or dictate text messages from a paired device.
- Change vehicle media source, radio station, or frequency.

*Applies to vehicles equipped with factory-installed navigation.

A variety of voice commands are available, depending on which language has been set in the Infotainment system and whether there is an active Premium Speech² plan, which unlocks more voice control capabilities. For full details and a list of compatible languages, please refer to your Owner's Manual and our [In-Vehicle Premium](#)  page.

A list of example voice commands can be found in your vehicle's Voice Control settings, as well as by accessing the "Help" menu in the Infotainment system and selecting **Voice operation**.

 [Watch the Voice Control Explained video.](#) 

 [Watch the Voice Control Operations video.](#) 

¹ Only available in select models and trims. See owner's literature for limitations and details.

² Premium Speech requires a myVW account, included or paid Premium Speech subscription, vehicle to be equipped with compatible infotainment system, acceptance of myVW+ Terms of Service, and availability of 4G LTE vehicle cellular and GPS connectivity. Availability of voice control functions and generative artificial intelligence features vary based on vehicle model, model year, and trim. MY23 and older vehicles do not have AI features. AI features integrated with Premium Speech are provided by a third-party, and use of the AI features are subject to the third-party provider's terms of use and privacy policy. Volkswagen is not responsible for the completeness, reliability, or accuracy of any information provided as a result of using the AI features. Any actions taken or reliance on such AI features are at your own risk. Always consult the Owner's Manual for specific information about your vehicle. Responses provided by the AI features are limited to information and events before November 2023.

Voice Control

Activation & Customization

Initiating a voice command can be accomplished either by manually pressing the talk button on the multi-function steering wheel or by using a wake word, like "Hello Volkswagen".

Manual Activation

- A short press of the Talk button  on the multi-function steering wheel activates the in-vehicle voice control¹.
- A long press of the Talk button  on the multi-function steering wheel activates the digital assistant of a connected compatible mobile device.

Wake Word Activation

To activate voice control¹ by voice with a wake word—also called an activation word—like "Hello Volkswagen", you'll first need to enable it:

1. Press the **MENU** button on the Infotainment system.
2. Select **Settings**.
3. Select **Voice operation**.
4. Scroll down to the "Wake word" section.
5. Check the box next to "Activate voice control via wake word".
6. Choose the default "Hello Volkswagen" wake word or create a Custom wake word.
 - Note: To deactivate wake word functionality, uncheck the "Active" box. If the wake word is disabled, you can still use voice control by pressing the Talk button  on the multi-function steering wheel.

Wake Word Customization

To change the wake word¹:

1. Press the **MENU** button on the Infotainment system.
2. Select **Settings**.
3. Select **Voice operation**.
4. Scroll down to the "Wake word" section.
5. Check the box next to "Activate voice control via wake word."
6. Check the box next to "Custom wake word."
7. Either say or type your new wake word by pressing either "Enter wake word by voice" or "Type in wake word."
 - Tip: Try choosing a wake word or phrase that has a higher detection rating to help prevent unintended activation of the voice control system. This means selecting a word or phrase that isn't part of your typical "everyday" conversation. The detection rating will be shown once a custom wake word is set.

¹ Only available in select models and trims. See owner's literature for limitations and details.

IQ.DRIVE

IQ.DRIVE Overview

IQ.DRIVE® is a driver assistance feature set designed to help make everyday driving more convenient and give added peace of mind. With a range of driver assistance features that work within system limitations, Volkswagen's IQ.DRIVE® technology is meant to support you on the road and, in certain situations, may help mitigate the severity of a crash or even avoid one.

IQ.DRIVE® features and functionality may vary based on vehicle model, model year, and trim.

IQ.DRIVE® does not replace the driver and cannot overcome the laws of physics. Drivers should always remain attentive and in control of the vehicle.

 [Watch the IQ.DRIVE Overview video.](#) 

System Limitations

In certain situations, driver assistance features may not engage or could trigger unwanted braking. While common examples are listed below, the full details about driver assistance functions and their limitations are available in the Owner's Manual.

- Poor weather conditions, such as heavy rain, snow, ice, or fog.
- Unclear or missing lane markings, such as in construction zones or narrow curves.
- Blocked, damaged, or misaligned sensors due to things such as dirt, ice, leaves, or other external debris.
- A heavy trailer or cargo can change sensor angles and disable features.
- Sharp curves or steep slopes can cause lane centering or alerts to fail.
- Reduced visibility from environmental factors, such as glare
- Traffic detection limitations, meaning certain systems may only react to traffic traveling in the same direction.
- External interference from nearby ultrasonic sources or non-VW accessories.

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

Driver Assistance Systems Settings

You can access the driver assistance systems settings menu in the Infotainment system, allowing you to modify the operation of driver assistance features.

1. Press the **Menu** button.
2. Press the **Assist Systems** icon .
3. Touch the image that represents the feature you'd like to modify.

OR:

4. Tap **List** or **Settings** (depending on your vehicle) to access a list of driver assistance system settings.

Depending on your vehicle, there may also be a button  on the steering wheel, at the end of the turn signal stalk, or below the Infotainment screen.

Driver Assistance features are not substitutes for attentive driving. See Owner's Manual for further details and important limitations.

IQ.DRIVE

Adaptive Cruise Control

This feature is not a substitute for attentive driving. ACC cannot bring vehicles with a manual transmission to a complete stop. See owner's manual for complete information and system limitations.

Adaptive Cruise Control (ACC) helps maintain an individually stored constant speed and a previously set distance between your vehicle and those in front of you. When you approach a slower-moving vehicle in front of you, the vehicle may brake if the situation requires. When the vehicle is no longer present, ACC will accelerate back to the stored speed.

[!\[\]\(339a16584d5da0f0a3ca4e9ec17bf6a1_img.jpg\) Watch the Adaptive Cruise Control video.](#) [!\[\]\(e06a1d39938b2f5d7a2c3618fea4f77f_img.jpg\)](#)

Activate Adaptive Cruise Control

Locate the Cruise Control buttons on the left side of the multi-function steering wheel.

1. Press the  button to activate Adaptive Cruise Control (or Cruise Control if ACC is disabled in the system settings).
2. A speedometer icon  or  will appear in the instrument cluster display.

Set Cruising Speed

1. When you get to your cruising speed, press the **SET** button on the multi-function steering wheel.
2. A green cruise control indicator light  or  will illuminate in the instrument cluster display.
3. To increase/decrease the speed by 1 mph increments, press the + or – button.
4. To increase/decrease the speed by 5 mph increments, press and hold the + or – button.

Cancel and Resume

1. To cancel the cruise speed, press the brake pedal or press the  button once on the multi-function steering wheel.
2. The green cruise indicator light  or  will turn off. Your last selected speed stays in memory until you turn off the ignition or turn Cruise Control off.
3. To resume your set speed, press the **RES** button on the multi-function steering wheel.

Turning the Cruise Control System Off

1. Press  twice.

Set the Distance Level

You can set the speed-dependent distance from the vehicle ahead to one of five levels.

To change the ACC distance interval, press the  button on the steering wheel to cycle through the distance intervals until you reach your desired distance level. When the shortest interval is reached, the distance returns to the greatest interval when the button is pressed again.

Deactivate Adaptive Cruise Control

To deactivate Adaptive Cruise Control and instead use Conventional Cruise Control:

1. Navigate to the Assist Systems menu  in the Infotainment system.
2. Using the arrow buttons  on the steering wheel, scroll to **Speed**.
3. Select **Cruise Control** in the instrument cluster display, then press the **OK** button.

Adaptive Cruise Control is now deactivated, and your vehicle will maintain the set speed using conventional cruise control until the next ignition cycle.

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

Travel Assist

This feature is not a substitute for attentive driving.

Within system limits, the Travel Assist system combines Adaptive Cruise Control and Lane Assist to help keep you centered in your lane and maintain a preset distance from the vehicle in front of you.

 [Watch the Travel Assist video.](#) 

Activate Travel Assist

1. Press the  button on the multi-function steering wheel to activate Adaptive Cruise Control.
2. Press the  button to switch from Adaptive Cruise Control to Travel Assist.
3. Press the **SET** button on the steering wheel at the desired speed.

Cancel Travel Assist

1. Press the brake pedal or press the  button on the steering wheel.

Resume Travel Assist

1. Press the **RES** button on the steering wheel.

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

Side Assist (Blind Spot Monitor)

This feature is not a substitute for attentive driving.

The Side Assist (Blind Spot Monitor) system helps the driver by detecting traffic behavior beyond the vehicle.

- The yellow indicator light on the respective side mirror will illuminate when a vehicle is detected in the blind spot on that side.
- The yellow indicator will blink if a vehicle in the blind spot has been detected and the turn signal has been activated in the direction of the detected vehicle.
- The yellow indicator light will remain lit rather than blinking if your vehicle is being overtaken or you are overtaking a vehicle with a speed difference of up to about 6 mph. There is no indicator if the passing speed is clearly faster.

If both Side Assist (Blind Spot Monitor) and Lane Assist are enabled in the driver assistance systems settings, the yellow indicator light will blink if a lane change is attempted with a vehicle in the blind spot, even if the turn signal is used. Corrective steering may occur.

 [Watch the Active Blind Spot Monitor video.](#) 

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

This feature is not a substitute for attentive driving.

Lane Assist helps keep your vehicle centered in your lane when driving above 35 mph. If the system detects that the vehicle is coming too close to a lane marker, Lane Assist warns the driver with gentle steering interventions (or nudges). The driver can override the corrective steering at any time.

This function is not suitable for, and not designed for, autonomously keeping your vehicle in a lane.

 [Watch the Lane Assist video.](#) 

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

Emergency Assist

Applies to vehicles equipped with Emergency Assist. This feature is not a substitute for attentive driving.

Emergency Assist can recognize driver inactivity and can automatically keep the vehicle in its lane and, if necessary, slow it down to a stop. While the ignition is on, Emergency Assist is active when:

- Lane Assist, Adaptive Cruise Control (ACC), or Travel Assist are active and the vehicle is in forward motion.
- The system can detect lane markers on the left and right sides of the vehicle.

If Lane Assist is disabled, Emergency Assist will not function unless Travel Assist is active.

 [Watch the Emergency Assist video.](#) 

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

Rear Traffic Alert

This feature is not a substitute for attentive driving.

Rear Traffic Alert monitors the cross traffic behind the vehicle when reversing out of a space or maneuvering. Radar sensors behind the cover of the rear bumper monitor the rear and side areas of the vehicle.

In the event of approaching moving objects, the driver is warned of the obstacle. If the driver does not respond, automatic braking support may kick in.

 [Watch the Rear Traffic Alert video.](#) 

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

IQ.DRIVE

Front Assist (Automatic Emergency Braking)

This feature is not a substitute for attentive driving.

Front Assist can recognize impending forward collisions and warn the driver. In addition, the system can provide support when braking and initiate an automatic braking maneuver. The Front Assist system can help to avoid accidents but cannot replace the driver's attention.

 [Watch the Front Assist video.](#) 

Front Assist can recognize the following objects, depending on vehicle equipment and system limitations:

- Vehicles.
- Pedestrians.
- Bicycles.

The way that Front Assist reacts to these objects depends on:

- Type of object.
- Direction the object is moving.
- Speed of the object.
- Speed of your vehicle.

Driver assistance features are not a substitute for attentive driving. See Owner's Manual for further details and important limitations. System performance may be limited by weather, road conditions, and visibility. IQ.DRIVE® technologies cannot overcome the laws of physics or prevent all collisions.

myVW App

Enrolling in myVW

The myVW mobile app¹ takes ownership to the next level, putting essential tools and information at your fingertips. Gain access to model-specific resources like video tutorials and owner's literature and stay informed of active factory coverages.

 [Watch the myVW Self-Enrollment video.](#) 

Below process applies if enrollment was not performed by a dealer.

To enroll in myVW:

1. Download the myVW app¹
2. Tap **Sign up**
3. Enter your email and a password
4. You'll get an email; select **Verify your email address**
5. Follow the steps in the app to set up your account
6. If your vehicle does not automatically show up in the app, it will prompt you to:
 - Enter your VIN (Find this below the windshield on the driver's side)
 - Use the app to scan a QR code in your infotainment screen. (Find this under **Setup Car-Net.**)

myVW+² is the new name for Car-Net, which enables access to Volkswagen connected vehicle services. Visit our [Connected Services page](#)  to learn more.

¹ myVW requires acceptance of myVW Terms of Service. Message and data rates may apply. Always pay careful attention to the road, and do not drive while distracted.

² Connected vehicle services enabled through myVW+ are available on most MY20 and newer vehicles and require an included or paid subscription, some of which may have their own terms and conditions. All connected vehicle services require the myVW app and myVW account, cellular connectivity, network compatible hardware, availability of vehicle GPS signal, and acceptance of Terms of Service. Not all services and features are available on all vehicles and some features may require the most recent software update. Services depend on connection to and continued availability of 4G LTE cellular service, which is outside of Volkswagen's control. Services are not guaranteed or warranted in the event of 4G LTE network shutdowns, obsolescence, or other unavailability of connectivity due to existing vehicle hardware or other factors. All services are subject to change, discontinuation, or cancellation without notice. Certain connected vehicle services may require additional payment for emergency or other third-party services rendered such as towing or ambulance transport services. Message and data rates may apply for app and web features. Connected vehicle services are not available on most MY20 Passat vehicles or rental fleet vehicles. See Terms of Service, Privacy Statement, and other important information at vw.com/connected. Always pay careful attention to the road and do not drive while distracted.

myVW App

Adding Additional Users

Additional users can be added to your myVW account through the following steps:

1. Log in to the myVW app¹
2. Open the **Account** tab (person icon) from the bottom navigation menu
3. Select **Vehicle Management**
4. Select **Additional Users**, then **Add user**
5. Complete the required fields
6. Select the role you wish the additional user to have (primary user or additional user)
7. Select the type of access to information and/or controls that you wish the additional user to have
8. Select the **Send invitation** button to text the additional user a link

The additional user then needs to tap the link in the message they received and follow the prompts to download the myVW app, set up their account, accept the terms of service, and add the vehicle to their garage.

¹ myVW requires acceptance of myVW Terms of Service. Message and data rates may apply. Always pay careful attention to the road, and do not drive while distracted.

Connected Vehicle Services

With the myVW app¹, you can enroll in and access a range of connected services and plans enabled by myVW+².

To see which plans are available for your vehicle, visit the Shop tab of the myVW app. For full details, visit our [Connected Services](#)  page.

 [Watch the myVW+ Overview video.](#) 

Safe & Secure

Use your Safe & Secure plan³ to get help when you're out on the road. You can drive with confidence, knowing we're here for you when things don't go quite like you planned.

 [Watch the Safe & Secure Video.](#) 

Remote Access

With Remote Access⁴, you can gain control of various vehicle features from your mobile device and receive real-time info, helpful alerts, and assistance to help enhance your driving experience.

View the Remote Functions section of this guide for more information on the remote vehicle functions available with a Remote Access plan.

 [Watch the Remote Access video.](#) 

Vehicle Insights

With VW Vehicle Insights⁵, you can feel confident about your next commute with access to features like maintenance alerts, vehicle health status, and more.

 [Watch the VW Vehicle Insights Video.](#) 

In-Vehicle Premium

Looking for even more? Whether you're embarking on a road trip or tackling your daily commute, In-Vehicle Premium⁶ can elevate any journey. In-Vehicle Premium helps add convenience to your drive and keep passengers entertained with access to features like:

- Wi-Fi hotspot⁷
- Premium Radio⁸
- Premium Speech⁹
- Premium Navigation¹⁰

In-Vehicle Premium features vary. Feature availability is dependent on subscription status, model, model year, and trim level. Visit the Shop tab in the myVW app to see which features are available for your vehicle.

¹ myVW requires acceptance of myVW Terms of Service. Message and data rates may apply. Always pay careful attention to the road, and do not drive while distracted.

² Connected vehicle services enabled through myVW+ are available on most MY20 and newer vehicles and require an included or paid subscription, some of which may have their own terms and conditions. All connected vehicle services require the myVW app and myVW account, cellular connectivity, network compatible hardware, availability of vehicle GPS signal, and acceptance of Terms of Service. Not all services and features are available on all vehicles and some features may require the most recent software update. Services depend on connection to and continued availability of 4G LTE cellular service, which is outside of Volkswagen's control. Services are not guaranteed or warranted in the event of 4G LTE network shutdowns, obsolescence, or other unavailability of connectivity due to existing vehicle hardware or other factors. All services are subject to change, discontinuation, or cancellation without notice. Certain connected vehicle services may require additional payment for emergency or other third-party services rendered such as towing or ambulance transport services. Message and data rates may apply for app and web features. Connected vehicle services are not available on most MY20 Passat vehicles or rental fleet vehicles. See Terms of Service, Privacy Statement, and other important information at [vw.com/connected](#). Always pay careful attention to the road and do not drive while distracted.

³ 3-year Safe & Secure connected vehicle services available on most MY26 and newer vehicles. For customers who do not have an existing Safe & Secure plan, the Safe & Secure included plan will begin on original (new, unused) vehicle in-service (purchase) date or June 1, 2023, whichever is later. Connected vehicle services are not available on most MY20 Passat vehicles. Valid in the U.S. only. Rental fleet vehicles and vehicles that are or have been classified as totaled, salvaged, or rebuilt are not eligible. Paid subscription is required to continue services after included plan expires. Visit the shop tab in the myVW mobile app to see how much time is remaining on your Safe & Secure plan. All services and features may not be available on all vehicles. For example, ID.4 and ID. Buzz vehicles do not include Stolen Vehicle Location services or Anti-Theft Alerts, and MY21 ID.4 vehicles do not have the Information Assistance service.

⁴ 3-year Remote Access connected vehicle services available on most MY26 and newer vehicles and included plan begins on the original (new, unused) vehicle in-service (purchase) date. Paid subscription is required to continue services after included plan expires. Visit the shop tab in the myVW mobile app to see how much time is remaining on your Remote Access plan.

⁵ 7-year VW Vehicle Insights connected vehicle services available on MY25 and newer Volkswagen vehicles. Valid in the U.S. only. The 7 years of coverage begins on the original (new, unused) vehicle in-service (purchase) date. Visit the shop tab in the myVW mobile app to see how much time is remaining on your VW Vehicle Insights plan. Paid subscription is required to continue services after included plan expires. Some electric vehicles do not include Vehicle Health Reports and Health Status services.

⁶ In-Vehicle Premium connected vehicle services enabled through myVW+ are available on most MY20 and newer vehicles and require an included or paid In-Vehicle Premium subscription. Included plan begins on the original (new, unused) vehicle in-service (purchase) date. Paid subscription is required to continue services after included plan expires. All connected vehicle services require the myVW app and myVW account, cellular connectivity, network compatible hardware, availability of vehicle GPS signal, and acceptance of Terms of Service. Not all services and features are available on all vehicles. Some services and features may have their own terms and conditions and may require the most recent software update. Services depend on connection to and continued availability of 4G LTE cellular service, which is outside of Volkswagen's control. Services are not guaranteed or warranted in the event of 4G LTE network shutdowns, obsolescence, or other unavailability of connectivity due to existing vehicle hardware or other factors. All services are subject to change, discontinuation, or cancellation without notice. Certain connected vehicle services may require additional payment for emergency or other third-party services rendered such as towing or ambulance transport services. Message and data rates may apply for app and web features. Connected vehicle services are not available on most MY20 Passat vehicles or rental fleet vehicles. Information Assistance is not available on MY21 ID.4. See Terms of Service, Privacy Statement, and other important information at [vw.com/connected](#) . Visit the shop tab in the myVW mobile app to see how much time is remaining on your In-Vehicle Premium plan. Always pay careful attention to the road and do not drive while distracted.

⁷ Wi-Fi Hotspot requires myVW account and mobile app, acceptance of myVW+ Terms of Service, and availability of vehicle 4G LTE cellular connectivity and vehicle GPS signal. Certain services may collect location information. The Wi-Fi Hotspot feature is intended for passenger use only. Up to 4 devices can be supported using in-vehicle connectivity. 4G LTE coverage is not available in all areas. Use of Wi-Fi Hotspot requires trial or paid Wi-Fi plan from third party wireless data provider and is subject to the data provider's customer agreement. If applicable, 30-day/1GB (whichever occurs first) hotspot trial begins on activation date. Limit one trial per vehicle. Paid subscription is required to continue Wi-Fi services after trial expires. Wi-Fi speeds may be reduced for customers who exceed a certain amount of data usage per month. See materials provided by the data provider for terms, privacy, and data security details. Services are not guaranteed or warranted in the event of 4G LTE network shutdowns, obsolescence, or other unavailability of connectivity due to existing vehicle hardware or other factors.

⁸ Premium Radio requires myVW account, paid Premium Radio subscription, vehicle to be equipped with compatible infotainment system, active Wi-Fi hotspot subscription, and availability of vehicle 4G LTE cellular and GPS connectivity.

⁹ Premium Speech requires a myVW account, included or paid Premium Speech subscription, vehicle to be equipped with compatible infotainment system, acceptance of myVW+ Terms of Service, and availability of 4G LTE vehicle cellular and GPS connectivity. Availability of voice control functions and generative artificial intelligence features vary based on vehicle model, model year, and trim. MY23 and older vehicles do not have AI features. AI features integrated with Premium Speech are provided by a third-party, and use of the AI features are subject to the third-party provider's terms of use and privacy policy. Volkswagen is not responsible for the completeness, reliability, or accuracy of any information provided as a result of using the AI features. Any actions taken or reliance on such AI features are at your own risk. Always consult the Owner's Manual for specific information about your vehicle. Responses provided by the AI features are limited to information and events before November 2023.

¹⁰ Premium Navigation requires myVW account, included or paid Premium Navigation subscription, vehicle to be equipped with compatible infotainment system with navigation, acceptance of myVW+ Terms of Service and availability of vehicle 4G LTE cellular and GPS connectivity.

myVW App

Remote Functions

With the Remote Access¹ and VW Vehicle Insights² plans, you can access remote features from the Home tab of the myVW app³. Here, you'll be able to:

- View your vehicle's door and window status, estimated fuel level, and odometer⁴.
- Remote start your vehicle⁵, lock or unlock your doors⁶, and if you need some help finding your parked vehicle, you can honk the horn and/or flash your lights⁷, and find your vehicle's last parked location⁸.
- Set vehicle alerts to keep track of features like your vehicle's speed and location⁹.
- Check your driving data and potentially save more by signing up for available insurance discounts with DriveView¹⁰.

Remote Start Using the myVW App

Start your vehicle remotely⁵, if remote start is equipped, using the myVW app³. Here's how:

1. Log in to the myVW app.
2. From the home screen, select **Remote Start**.
3. Tap **Start**.
4. When prompted, confirm the vehicle location by entering your four-digit PIN.
 - If enabled, iOS devices may use Face ID for authentication instead of entering the PIN.
5. A "success" message and countdown timer should appear on the home screen to indicate the vehicle has been started.
 - If the remote start request is unsuccessful, a notification will appear and ask that you try again.

Lock/Unlock Using the myVW App

Lock or unlock your vehicle doors⁶ from your myVW app³. Here's how:

1. Log in to the myVW app.
2. From the home screen, select **Doors**.
3. Tap either **Lock** or **Unlock**.
4. A "success" message appears on the home screen to indicate the doors have either locked or unlocked.
 - If the lock or unlock request is unsuccessful, a notification will appear and ask that you try again.

Honk and Flash Lights Using the myVW App

Use the Honk & flash⁷ feature to help you find your vehicle in a crowded parking lot, or in situations where you need to get attention. Here's how:

1. Log in to the myVW app³.
2. From the home screen, select **Honk & flash**.
3. Tap either:
 - **Flash lights** to only flash the vehicle headlights.
 - **Honk & flash** to flash the headlights and honk the horn.
4. A "success" message appears on the home screen to indicate that the "Flash lights" or the "Honk & flash" request was successful.
 - If the "Flash lights" or "Honk & flash" request is unsuccessful, a notification will appear and ask that you try again.

Setting Vehicle Alerts

Vehicle alerts⁹ in the myVW app³ allow you to easily set boundaries to help you keep track of things like your vehicle's speed and location.

Set a Boundary Alert

Boundary Alerts⁹ lets you know when your vehicle enters or exits a designated area. Up to **four** boundary alerts can be set. Here's how:

1. Log in to the myVW app³.
2. From the home screen, select the ellipsis (three dots) in the upper right corner next to your vehicle's image.
3. Choose **Set up vehicle alerts** from the dropdown menu.
4. Choose **Boundary**.
5. Select **Create Boundary Alert** and set your location either by clicking on the map or searching for a place in the search bar.
6. Set the radius either by using the + button or by moving the slider to the right to increase the radius from 0-25 miles.
7. After the location is set, in the "Create Boundary Alert" screen, you can then:
 - Customize the name of the boundary in the "Name alert" field.
 - Adjust the date and time, and occurrence, if desired.
 - Modify the notification setting to send alerts when the vehicle has entered and/or exited the given radius.
 - Set the alert frequency.
 - Manage who will be notified of this boundary alert.
 - Tip: New contacts can be added by selecting **Manage alert contacts** in the "Email alert" and "Text (SMS) alert" submenus.

Set a Curfew Alert

Curfew Alerts⁹ can help you keep track of when your vehicle is in use during a specific timeframe that you set. Up to **two** curfew alerts can be set at a time. Here's how:

1. Log in to the myVW app³.
2. From the home screen, select the ellipsis (three dots) in the upper right corner next to your vehicle's image.
3. Choose **Set up vehicle alerts** from the dropdown menu.
4. Choose **Curfew**.
5. Select **Create Curfew Alert** and in the next menu, customize the following settings:
 - Customize the name of the curfew alert in the "Name alert" field.
 - Adjust time, day, and occurrence, if desired.
 - Set alert frequency.
 - Manage who will be notified of the curfew alert.
 - Tip: New contacts can be added by selecting **Manage alert contacts** in the "Email alert" and "Text (SMS) alert" submenus.

Set a Speed Alert

Get a heads-up when your vehicle is driven faster than you'd like by setting a Speed Alert⁹. Up to **two** speed alerts can be set at a time. Here's how:

1. Log in to the myVW app³.
2. From the home screen, select the ellipsis (three dots) in the upper right corner next to your vehicle's image.
3. Choose **Set up vehicle alerts** from the dropdown menu.
4. Choose **Speed**.
5. Select **Create Speed Alert** and in the next menu, customize the following settings:
 - Customize the name of the speed alert in the "Name alert" field.
 - Set the maximum speed using the + and - buttons or moving the slider to the desired speed (up to 80mph).
 - Tip: When using the + and - buttons, the mph value is adjusted in increments of 5; whereas the speed slider can be used to adjust the mph value by 1.
 - Adjust time, day, and occurrence, if desired.
 - Set alert frequency.
 - Manage who will be notified of the speed alert.
 - Tip: New contacts can be added by selecting **Manage alert contacts** in the "Email alert" and "Text (SMS) alert" submenus.

Set a Valet Alert

When you set the Valet Alert⁹, myVW creates a 0.25-mile radius from where your vehicle is located. You'll be notified if your vehicle leaves that radius, so you can valet or park your car with peace of mind. Here's how:

1. Log in to the myVW app³.
2. From the home screen, select the ellipsis (three dots) in the upper right corner next to your vehicle's image.
3. Choose **Set up vehicle alerts** from the dropdown menu.
4. Choose **Valet**.
5. Select **Create Valet Alert** and in the next menu, you can:
 - Set the alert frequency.
 - Manage who will be notified of the valet alert.
 - Tip: New contacts can be added by selecting **Manage alert contacts** in the "Email alert" and "Text (SMS) alert" submenus.

¹ 3-year Remote Access connected vehicle services available on most MY26 and newer vehicles and included plan begins on the original (new, unused) vehicle in-service (purchase) date. Paid subscription is required to continue services after included plan expires. Visit the shop tab in the myVW mobile app to see how much time is remaining on your Remote Access plan.

² 7-year VW Vehicle Insights connected vehicle services available on MY25 and newer Volkswagen vehicles. Valid in the U.S. only. The 7 years of coverage begins on the original (new, unused) vehicle in-service (purchase) date. Visit the shop tab in the myVW mobile app to see how much time is remaining on your VW Vehicle Insights plan. Paid subscription is required to continue services after included plan expires. Some electric vehicles do not include Vehicle Health Reports and Health Status services.

³ Connected vehicle services enabled through myVW+ are available on most MY20 and newer vehicles and require an included or paid subscription, some of which may have their own terms and conditions. All connected vehicle services require the myVW app and myVW account, cellular connectivity, network compatible hardware, availability of vehicle GPS signal, and acceptance of Terms of Service. Not all services and features are available on all vehicles and some features may require the most recent software update. Services depend on connection to and continued availability of 4G LTE cellular service, which is outside of Volkswagen's control. Services are not guaranteed or warranted in the event of 4G LTE network shutdowns, obsolescence, or other unavailability of connectivity due to existing vehicle hardware or other factors. All services are subject to change, discontinuation, or cancellation without notice. Certain connected vehicle services may require additional payment for emergency or other third-party services rendered such as towing or ambulance transport services. Message and data rates may apply for app and web features. Connected vehicle services are not available on most MY20 Passat vehicles or rental fleet vehicles. See Terms of Service, Privacy Statement, and other important information at vw.com/connected. Always pay careful attention to the road and do not drive while distracted.

⁴ Refer to your vehicle's warning and indicator lights for the most current diagnostic information. Always consult owner's literature for maintenance guidelines and warnings. Vehicle Health Reports and Health Status may not be available on all EV models.

⁵ Requires compatible factory-installed remote start feature. See Owner's Manual for further details and important warnings about the keyless ignition feature. Do not leave vehicle unattended with the engine running, particularly in enclosed spaces, and consult local laws for any limitations on use. Message and data rates may apply.

⁶ Message and data rates may apply. See Owner's Manual for further details and important warnings about locking and unlocking your vehicle remotely.

⁷ Remote Honk & Flash requires myVW mobile app and acceptance of myVW+ Terms of Service. Message and data rates may apply.

⁸ Last Parked Location requires acceptance of myVW+ Terms of Service. Message and data rates may apply. Do not use feature to locate stolen vehicle.

⁹ Vehicle Alerts require myVW mobile app and acceptance of myVW+ Terms of Service. Message and data rates may apply.

¹⁰ DriveView requires myVW account and acceptance of myVW+ Terms of Service. Use of your vehicle by multiple drivers may impact your driving score. Always obey all speed and traffic laws.
